

RESOLUTION COPPER BEYOND THE MINE

Resolution Copper is more than a mine in its planning, permitting and development stage.

It's a team of dedicated people working toward the common goal of supporting nearly 25% of U.S. copper demand; a critical mineral to everyday life.

We're working to build the American economy, starting at home: Arizona. Resolution Copper will create approximately **3,700 direct and indirect jobs**, providing **\$270 million per year** in total compensation at peak production, setting up our local economy for generations to come.

Arizona is a state defined by its people, its communities, and its families. We're proud to give back to the people of this state, boosting state and local tax revenues by up to **\$113 million per year**, once fully operational.

Arizona stands to benefit from over **\$61 billion in economic value** over the multi-generational life span of this project.

Our world-class copper mine is dedicated to providing benefits for the local communities in the Copper Triangle. Congress' federal land exchange legislation, in conjunction with Resolution Copper, is an opportunity for The Town of Superior to receive **545 acres of federal lands**, ideal for economic expansion and diversification.

Resolution Copper is made up of people who live and work in the Copper Triangle, Copper Corridor and nearby tribal communities. We care about these communities, in and around the town of Superior, and want to help them thrive. From our water monitoring program to our environmental conservation projects, we've established a strong partnership with the community, for the community.

AT MAXIMUM OPERATION

3,700 JOBS

Resolution Copper will create approximately 3,700 direct and indirect jobs

\$270 MILLION

per year in total compensation at peak production

UP TO \$113 MILLION

in state and local tax revenues per year

\$61 BILLION

economic value to the state of Arizona over the multi-generational life span of this project
