

# OUR COMMITMENT TO NATURE'S LEGACY

## PRESERVING APACHE LEAP FOR TOMORROW

We recognize the concerns about our mining operations potentially affecting the beautiful Apache Leap area. Resolution Copper listened to this feedback and has proactively designed our mine plan to protect this treasured area.

### COMMUNITY COLLABORATION

Our plans were developed in close consultation with local communities and Native American tribes, addressing concerns about public access, grazing rights, and the protection of culturally significant areas.

### LAND PROTECTION

800+ acres designated as a Special Management Area (SMA), which is strictly overseen by the U.S. Forest Service to ensure it remains untouched and preserved.

### ENVIRONMENTAL MONITORING

From construction to reclamation, ongoing environmental monitoring ensures that the area remains safeguarded. These reports will be publicly available, maintaining transparency with our community.

**We're dedicated to preserving the natural beauty and cultural significance of Apache Leap, ensuring it remains pristine for future generations.**
